

**Maine School Administrative District #75
Input for Technology Plan**

The 2003 Technology plan identified a strategy to create a technology focus group made up of experienced teachers who are creative and possess a good degree of proficiency with technology. The District started a new technology integration committee (TIC) during the 2003 Technology Plan years to address the needs of teachers and students to successfully use technology. The TIC committee worked this year by providing a broad base of input to the new technology plan. The committee meets the first Thursday of each month and utilizes an online collaboration tool for members to continue discussions online.

All district staff members reviewed the district technology vision and goals on a professional development day. Staff provided feedback on a SharePoint collaborative workspace.

Participants include:

Michael Wilhelm, Superintendent of Schools	Sally Loughlin, Assistant Superintendent of Schools
Patrick Moore, Director of Special Services	Michael Baker, Director of Technology
